

August 2021 COVID Guidelines Update

Date: August 27, 2021

To All Chapters:

Given the recent uptick in hospitalizations and CDC guidance relative to the Delta Variant, below is the updated and current COVID guidelines for ADK.

Programs and Chapters

Program participants must be vaccinated and show proof upon arrival, unless there is proof of a valid medical exemption. If the program is indoors, masks are required. If it is outdoors, masks are not required unless social distancing is not possible.

Lodging Facilities

Guests over the age of 12 are required to show proof of vaccination at check-in unless they provide a valid medical exemption. Valid proof constitutes either a vaccine card or a state-approved digital version, like the Excelsior Pass. We are allowed to ask for proof of medical exemption if needed.

If guests show up without proof, we will require them to sign a liability release form upon check-in. If they refuse, then they cannot stay with us. We will not accept religious exemptions.

Additionally, masks are required indoors for all guests and visitors. This will be enforced in public areas, but we will leave it up to guests to self-regulate in shared rooms.

We will be notifying all guests about this in pre-arrival emails and via an updated form on our reservation booking engine.

The High Peaks Information Center (HIPC) will not require proof of vaccination at this time but will require masks for all visitors.
